

Easy Wedge Skirt Pattern

Eithni ingen Talorgain eithni@gmail.com

Body measurement to take	Measurement in inches	Calculation	Final number	Key
Waist to Floor		Add 4" =		A
Waist		For slimmer skirt: Divide by 3 = For a fuller skirt: Divide by 5 =		B
Waist		Add 3.5" =		C
Hips		(hips - waist) + 3" =		D
Total yardage (45" wide or 60" wide fabric will work)	Use A	For slimmer skirt: (A x 2) + 6" = For a fuller skirt: (A x 3) + 6" =		

Skirt – cut two for a slimmer skirt and three for a fuller skirt

1. Cut along the dotted line so you have some wedges with two slanted edges and some wedges with one slanted edge and one straight edge. Pair up the pieces with one straight edge and sew them together along the straight edges so that all your wedges are approximately the same shape and size with two slanted sides each.
2. Fold the placket in half the long way, sew one short edges. Clip, turn, and press to make a finished corner. Sew it to one of the skirt segments along a slanted edge, so that the long unfinished edge of your placket starts at the top of the skirt segment. This segment will be called segment A.
3. Starting with the side of segment A that does NOT have the placket, sew all skirt segments together so that all the wide parts are at the bottom and the measurement B sides are at the top.
4. Once all the segments are sewn together in a line, pin the placket side of segment A to the last segment in the line along the slanted edge. Start sewing 1" before the bottom of the placket (D-1" from the top of the skirt) and sew to the hem, creating a large cone. Hem the slanted skirt edge that is not sewn to the placket.
4. Sew the waistband in half by sewing the two short edges. Clip, turn, and press.
5. Sew the top of the skirt into only ONE edge C of the waistband, leaving the placket flat and pleating in the skirt to fit. Turn the other edge C of the waistband under $\frac{1}{4}$ " and whip stitch to the inside of the skirt to enclose the raw edges of the skirt and waistband.
6. Trim the bottom of the skirt segments into a curve and hem the bottom of the skirt to the desired length.
6. Use a button or a hook to fasten the top of the skirt.
